# Elephantech Announces U.S. Safety Standard Certification Granted by UL

Elephantech Inc. (head office: Chuo-ku, Tokyo, CEO: Shinya Shimizu, hereinafter "Elephantech") is pleased to announce that the company has been granted safety standards certification in flammability classification of V-0 for P-Flex® PI, a flex PCB produced in own plant from UL (Underwriters Laboratories), an international third-party testing and certification institution.

With its newly-granted certification, Elephantech hopes that as many customers as possible will acknowledge the safety and reliability of P-Flex. Please feel free to contact our P-Flex Sales Department or our distributors for more information or clarification.

With a mission to "Making the world sustainable with new manufacturing technologies", we spare no effort in our attempts to make any little contribution to the development of the electronics industry.
