## We have changed the color of the Flex PCB P-Flex® legend to white

May 8, 2019

Elephantech Inc. (head office: Chuo-ku, Tokyo, CEO: Shinya Shimizu, hereinafter “Elephantech”) manufactures P-Flex®, a Flex PCB that can be produced with inkjet printing, which significantly reduces environmental burden following our mission of “Making the world sustainable with new manufacturing technologies”. As of April 23, 2019, we have changed the color of the P-Flex® legend from black to white.

Although black had been used in the past, we have made the above change in response to the many requests received from customers to use white as generally used in circuit boards.

※Legends are printed characters that support the mounting procedure and are also known as "silk-screen printing". At Elephantech, we call it legend printing as we print the characters by inkjet, not by silk-screen.

## Company Overview

---

<b>Name</b>	Elephantech Inc.
<b>Representative</b>	Shinya Shimizu, CEO
<b>Establishment</b>	January 2014
<b>Capital</b>	JPY 506,040,000
<b>Address</b>	4-3-8 Hatchobori, Chuo-ku, Tokyo 104-0032, Japan
<b>URL</b>	<a href="https://www.elephantech.co.jp/en/">https://www.elephantech.co.jp/en/</a>
<b>Business description</b>	Development of printed electronics manufacturing technology and provision of related services
